What You Will Learn

Build better training in less time with this practical course designed to help you streamline your course development process using a proven instructional design model. You'll learn to apply the ADDIE model to support stronger learning outcomes, use AI tools effectively across all phases of course design, and align your course objectives with your assessments. The course also equips you to design content that is both accessible and impactful, enhancing your overall teaching and learning practices.

Key Features

Self-paced, fully online

Total time commitment

Mobile-friendly & interactive

Designed by instructional design experts

Certificate on completion

Who This Is For

- + Corporate Learning Professionals
- + Subject Matter Experts developing training for internal company use
- + L&D teams seeking faster, smarter development workflows

No AI expertise required.
Just curiosity and a desire to teach better.

AI-Empowered ADDIE for Corporate Learning Professionals
