What You Will Learn

This course is for the doers! Educators who are ready to take the next step in their AI journey.

Dive into practical tools, smart prompts, and responsible practices that enhance your everyday teaching. You'll learn how to apply AI in real classroom scenarios, improve lesson planning, grading, and feedback with generative AI, and choose tools that align with your subject and teaching style. The course also equips you to guide students in using AI safely and ethically, while helping you spot bias, evaluate AI outputs, and protect student privacy.

Key Features

Self-paced, fully online

2 hours — **Total time commitment**

Mobile-friendly & interactive

Designed by instructional design experts
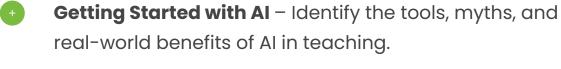

Certificate on completion

Who This Is For

- ⊕ Teachers already exploring AI
- ⊕ Digital champions in schools
- ⊕ Educators looking for step-by-step tool guidance

AI for Teachers: In Practice

Course Topics

- ⊕ **Getting Started with AI** – Identify the tools, myths, and real-world benefits of AI in teaching.

- ⊕ **AI in Your Teaching Workflow** - Use GenAI for planning, content creation, personalisation, and marking.

- ⊕ **Ethics and Privacy in the Age of AI** - Explore risks, privacy concerns, and model responsible AI use for your learners.
