Self-Paced Online Short Course

An Introduction to Online Learning

Crush Your First Online Learning Experience!

Start Today

What You Will Learn

Your online learning journey starts here with a practical short course designed to build your confidence in digital learning environments. You'll explore the key differences between face-to-face and online learning, assess your digital readiness, and learn to navigate virtual classrooms and LMS platforms. The course also helps you develop essential time management and communication skills, understand the ethical use of AI in education, and create a personalised strategy for online learning success.

Key Features

- **Self-paced, fully online**
- **4.5 hours** Total time commitment
- **Mobile-friendly & interactive**
- **Designed by instructional design experts**
- **Certificate on completion**

Who This Is For

- School leavers transitioning to online study
- First-time digital learners in higher education or workplace settings
- Anyone looking to boost their online learning skills with practical guidance

Introduction to Online Learning

Course Topics

- **Online Learning Fundamentals** - Recognise the basics of learning in digital spaces
